IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

This notice contains important information regarding your drinking water.

Este informe contiene información muy importante sobre su agua potable.
 Tradúzcalo o hable con alguien que lo entienda bien.

MONITORING REQUIREMENTS NOT MET FOR LAKE MADRONE WATER DISTRICT

Our water system failed to monitor as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2024, we failed to have our Star well tested for Nitrate and therefore, cannot be sure of the quality of our drinking water during that time.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required Sampling Frequency	Number of Samples Taken	When All Samples Should Have Been Taken	When Samples Were or Will Be Taken
Nitrate	12 Months	1	2024	By March 6, 2025

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

A nitrate sample from Star well was taken by North State Water Testing (NSWT) on February 26, 2024. The sample was received “in error” by Pace Lab. Pace Labs contacted NSWT on March 1, 2024, to schedule a nitrate re-sample of Star well. The re-sample was never executed.

Our solution to the problem is two-fold:

- (1) Immediate re-sample by NSWT for Nitrate at Star well and testing by Pace Labs to become compliant.
- (2) To avoid future violations, representatives of the Lake Madrone Water District will monitor and verify the scheduled sampling of water by North State Water Testing and subsequent testing by Pace Labs, to remain in compliance with the California Code of Regulations (CCR) Title 22, Section 64432.1(a).
